Ameda Flange Sizing Guide

Print this sheet at 100% scale for accuracy. Cut along the dotted lines to measure your nipple diameter. Be sure to measure BEFORE pumping.

Step 1: Measure Your Nipple

Use the ruler on the tool to measure your nipple in millimeters as shown below. Do not measure the areola.

Step 2: Find the Closest Hole

Gently place your nipple into the holes, starting with the smallest one that fits without squeezing.

Step 3: Choose the Right Flange Size

Pick a flange that is 2-3mm larger than your nipple measurement.

If you're between sizes, start with the larger flange for comfort.
